Jute & Jute Blends

Care Instructions

- Keep out of direct sunlight to avoid fading or discoloration.
- Shedding is an inherent characteristic of natural-fiber rugs and will gradually subside with vacuuming and proper care.
- Clean spills, including water, immediately by blotting with a clean, dry sponge or cloth. Avoid exposure to all liquids.
- Dust lightly and vacuum regularly, using a vacuum cleaner without a beater bar or one where you can set the bar to the highest pile setting. If your vacuum has variable power settings, set on low. Vacuum the full length of the rug, turn and repeat on the next area, rather than back and forth motion.
- Brush the area with a soft bristle brush to remove dirt and vacuum the area again to remove lifted residue.
