# Onyx

## Care Instructions

- Address spills immediately by wiping with a dry, soft cloth. Natural stone is a porous material, and although it has been sealed, spills should be blotted promptly to minimize staining.
- Dust regularly with a soft, damp cloth, followed by a dry one.
- Do not use window cleaning fluids, scouring compounds, gritty cloths, or strong solvents such as alcohol, ammonia or acetone as they may damage the finish.
- Use coasters, trivets and placemats for protection against hot or wet items.
- Surfaces are not scratch- or heat-resistant and may scuff or stain without proper care. To maintain stone’s natural appearance, avoid using sharp objects on surfaces.
